What Legends are made of

Valor has played a major role in revolutionizing the fireplace industry and has become a long-standing industry leader.

The Valor Legend G3 Insert provides an ideal up-grade for any masonry or factory-built fireplace, and can be built into any construction. Its versatility and ability to blend with any room setting makes it an ideal home heating solution.

For years Legend owners have stayed cozy during cold winter night - even during power failures. Just another reason that Valor has consistently been a best-seller in North America.

Comfort, Efficiency and Elegance... the Legend continues.

Steady even heat at your fingertips!

Handy Storage Mount

The ValorStat™plus remote control is a **Standard feature** with all the Legend G3 units. A handy storage mount is also included.

Valor Cruise Control

It's simple! Turn on your Valor - pick your setting - and let ValorStat do the rest.

The fully automatic modulation system self-regulates the fire to maintain a steady, even temperature, using only the amount of fuel that is required to keep you comfortable. With our 70% turndown rate, you will receive maximum fuel efficiency - cutting down on your energy costs!

Valor - The Wise Way to Heat

ValorStat™plus

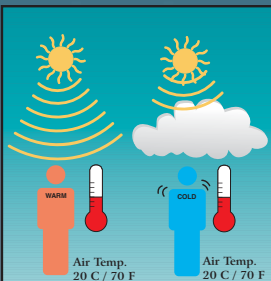

This unique programmable remote lets you control your fireplace in 3 different ways:

- ▶ Manually set your desired flame height.
- ▶ Set the time and temperature to turn your fireplace on or off.
- ▶ Use the automatic mode to adjust your fire up or down to maintain the room temperature that you set.

The magic of Radiant Heat

Radiant heat satisfies human comfort requirements with up to 30% less energy when compared to warm air systems. Like sunshine, radiant energy is efficiently distributed at light speed, converting to heat when it encounters people and objects in a room. Our unique Valorflame burner technology maximizes the radiant output of our fires for a natural and soothing warmth that will keep you comfortable even with lower air temperatures. A BTU of Valor heat output will be more effective at making you feel comfortable than the equivalent BTU of heat from your forced air furnace and from other gas fireplace designs. This is one of the reasons why our BTU range is all the

heating power that you will likely need for most room applications.

You feel comfortable when radiant heat comes in contact with you.

OUTSIDE AIR FOR COMBUSTION

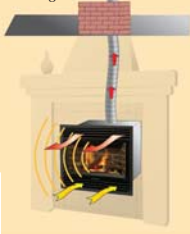

EXHAUST

RADIANT HEAT

HEAT CONVECTION

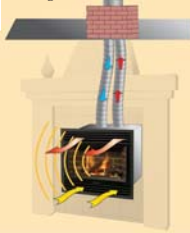

INSIDE AIR

Conventional Venting 738

Use either the B-Vent model (Top) with a single 3-inch liner or the Direct-Vent (Bottom) with co-linear 3-inch venting.

Direct Venting 739

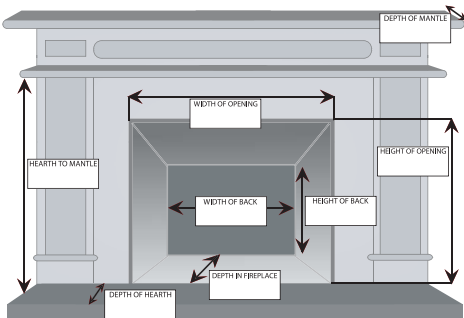

HEAT WITHOUT ELECTRICITY

Specially designed heat exchangers are incorporated into every Valor fireplace to naturally circulate warm air by convection. While we still offer a fan as an option, you'll likely find it unnecessary.

HEAT WITHOUT A FAN

When the power fails, your Valor won't! No electrical hook-up requirement means that a Valor is a great choice as a standby heating system for areas susceptible to blackouts.

REAR INSERT DIMENSIONS

The Right Fit For You!

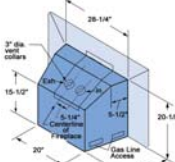

We want you to be sure that the Legend G3 is the right choice for your home.

To help you ensure that you are purchasing the right product for your current mantel, fill in the dimensions as indicated in the diagram.

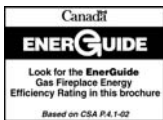

Once you have recorded all the necessary measurements, visit the Valor dealer nearest you. Your authorized Valor dealer will be able to assess the information they are given and provide you with the Valor product that will best satisfy your requirements.

738 B-Vent Insert Dimensions

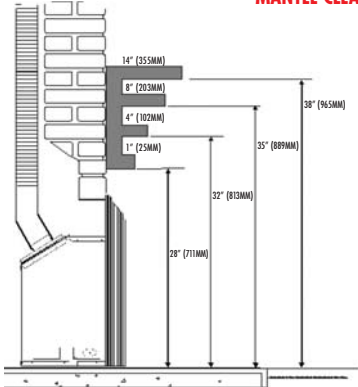

739 Direct-Vent Insert Dimensions

Model	Fuel	Vent Type	Max Input	Min Input	Max Output	Energyguide Rating Fireplace Efficiency	Steady State Efficiency (Without Fan)
7388VN	NG	B-Vent	24,000	6,500	16,180	57.5%	67.4%
7388VP	LP	B-Vent	24,000	13,000	16,180	57.5%	67.4%
7390VN	NG	Direct-Vent	24,000	6,500	16,320	61.6%	68.0%
